The screenshot shows the GitHub repository page for `ampproject / amphtml`. The repository has 674 stars and 3.6k forks. It features 24 branches and 742 tags. Recent commits include fixes for broken query selectors and package management. The repository uses the AMP web component framework. It includes links to `amp.dev`, a `Readme`, and the `Apache-2.0 License`. There are 742 releases, with the latest being `2010132225002` from 2 days ago. No packages have been published. The repository has 959 contributors, with 948 more listed. The code is primarily written in JavaScript, with smaller portions in CSS, XML, and other languages.

goToSlide(index=0) does not work on amp-base-carousel

New issue

#30523

Open

esng25 opened this issue 18 days ago · 3 comments · May be fixed by #30839

esng25 commented 18 days ago · edited

...

What's the issue?

goToSlide(index=0) does not work on amp-base-carousel. It works on amp-carousel just fine.

How do we reproduce the issue?

1. Create a amp-base-carousel with three slides.
2. Create an object with on="tap:base-carousel.goToSlide(index=0)"
3. Index=1...etc works fine. 0 does not work.

See jsfiddle: <https://jsfiddle.net/d1ces5jm/3/>

What browsers are affected?

All browsers are affected as this is a javascript issue.

Which AMP version is affected?

Using current version.

코드 리뷰에 관하여

리뷰어는 절대 당신을 비난하지 않습니다.

코드 리뷰는 더 나은 코드를 만들어나가기 위한 과정으로,
그 과정에서 크고 작은 이슈들이 발생하게 됩니다.

하지만 언제나 기억해야할 점은,
코드 리뷰가 당신을 향한 공격이 아니라,
코드를 더 낫게 만들기 위한 과정이라는 점입니다.

코드 리뷰를 받다보면 코드와 자신이 일체화되는 경우가 있는데,
코드는 코드일 뿐이라는 점을 항상 기억하고 작업하는 것이
여러분들의 오픈 소스 활동에 크게 도움을 줍니다.

여러분들의 오픈 소스 활동을 응원합니다.

techhtml commented on 18 May 2017 • edited by aghassemi

Contributor 😊 ...

What's the issue?

Imgur is huge image community on the web,
They support embedding but that codes are

```
<blockquote class="imgur-embed--pub" lang="en" data-id="Lwr47i3"><a href="//imgur.
```

Proposed format:

```
<amp-imgur data-imgur-id="DYI27Yt" layout="responsive" width="1" height="1"></amp
```

I think this can't embed using Iframes.

aghassemi changed the title **Embed imgur Add support for embedding imgur** on 19 May 2017

aghassemi self-assigned this on 19 May 2017

aghassemi added **Category: Presentation** **P3: When Possible** **Type: Feature Request** labels on 19 May 2017

aghassemi added this to the **New FRs** milestone on 19 May 2017

aghaseemi commented on 19 May 2017

Contributor 😊 ...

@techhtml Thanks for filing.

Should be similar to `<amp-instagram>` embed (likely much lighter on the implementation).

Contributions are very welcomed! <https://bit.ly/helpamp> if you are interested.

aaghaseemi left a comment

Contributor

...

This won't be a useful component unless it handles resizing. Since imgur (similar to instagram) adds extra text and padding around the image, there is no way for the author to know the width and height to set here.

`amp-imgur` should be able to resize the iframe after imgur adds the extra chrome around the image. This can be done two ways:

- 1- imgur's iframe might be sending messages to the parent notifying of size changes, if that's the case, we can use this code and just listen for that message and request a resize.
- 2- use imgur's SDK to embed the image in an AMP 3p frame and measure and send a resize request (similar to `amp-instagram`)

Idea is for user to specify the width and height of the `image` only and for component to resize properly to account for the chrome around the image. Without handling resize, this is no different than `amp-iframe src=imgur.com/id/embed`

techhtml commented on 20 May 2017

Contributor

Author

...

@aaghaseemi I also think if this component can't resize, it's not helpful for other users.
I'll rebuild this one use SDK for imgur and amp 3p iframes.

Thank you.

#hacktoberfest #hacktoberfestseoul

aghassemi commented on 25 May 2017

Contributor

...

@techhtml looks like Imgur does send `resize` messages back to parent, so the old approach of using iframe to point to imgur would work fine, we just need to listen for the resize message and do a `attemptchangeHeight()`

Checkout <https://codepen.io/aghassemi/pen/wdOGwB?editors=1111> with console open, note that imgur sends a `{isTrusted: true, data: {`

```
{"message": "resize_imgur", "href": "https://imgur.com/ub=true", "height": 509, "width": 540, "context": true}, origin: "https://imgur.com", lastEventId: "", source: Window...}
```

message after load.

So what we need to do is:

- 1- revert to the old iframe code you had
- 2- install a message listener in `amp-imgur`'s `layoutCallback`
- 3- when received `resize_imgur` call `this.attemptChangeHeight` with the width/height that comes from imgur.
- 4- remove the message listener in `amp-imgur`'s `unlayoutCallback`

`amp-playbuzz.js` can be a good reference as it does exactly this.

Thank you! @aghassemi I have a Q about my issues #9405.

Cramforce said to me it seems better if just loads an image with some Imgur branding.

Actually, it's not bad. but that logic only work when Imgur have the single image.

So, What is the best for Imgur?

Now I start tried to replace 3p-iframe to iframe and add message listener and resize that.

...

@techhtml we chatted about this in today's review meeting (#8902). Decided ideal solution is normal iframe if we get resize messages from imgur and since we do, let's go with that approach.

...

You can remove the `function() {}` and just pass `cb`.

Thanks @techhtml few comments, nothing major. Thanks for iterating on this to deliver the ideal solution.

extensions/amp-imgur/0.1/amp-imgur.js Outdated

...

no need to keep a reference to the promise. just return
this.loadPromise(iframe); in layoutCallback

Thank you for contributing a new component! I've reviewed only the validator portion of the PR.

In addition to those changes, it would be nice to add a test file for validation. It comprises of two files:

`amp-imgur/0.1/test/validator-amp-imgur.html`

`amp-imgur/0.1/test/validator-amp-imgur.out`

For more information on the test files see

<https://github.com/ampproject/amphtml/blob/master/contributing/component-validator-rules.md#test-files>

`extensions/amp-imgur/0.1/validator-amp-imgur.protoascii`

```
17 + tags: { # amp-imgur
18 +   html_format: AMP
19 +   tag_name: "SCRIPT"
20 +   satisfies: "amp-imgur extension .js script"
```

honeybadgerdontcare on 26 May 2017

Contributor

...

Please put `requires: "amp-imgur"` after this `satisfies`.

Validation looks good. The test files I mentioned are optional.

@techhtml Thanks! It looks like the current travis failure may be due to another PR [#9575](#). I've asked them to look into it.
